

# Ex Keyboard

The 4-keys Ex Keyboard allows you to set the price to be paid in the fuel dispensers. As can be deduced from the marking the Ex Keyboard must be installed in places where it is unlikely to originate explosive atmospheres of gases, vapors or mists or, in case this occurs, this happens only rarely or for a short period of time. The ideal position could be next to the display outside the dispenser. Below are the technical characteristics and the Ex marking.

## Technical Data

Number of keys	4	
Contact type	NO	
Maximum resistance	100	Ω
Maximum current	20	mA
Maximum voltage	24	Vd
Operating temperature	-20 +40	°C
Maximum superficial temperate	+40	°C
Cable length	250	cm
Dimensions	100x40x19	mm
Fixing	2 screws	
Maximum depth of threaded holes	5.5	mm
