

**DISPLAY OF THE SW VERSION OF THE ELECTRONIC HEAD DEVICE PM2  
MOD.LBZZ22900**

The plc PM2 head is normally connected to a display, to detect the software version loaded inside it must remove the power supply to the head until it is completely turned off and then power it and observe the numbers that will appear on the display

At the time of commissioning, the display will show the software versions for 5 seconds. The number corresponding to the loaded software version will be displayed on the display for displaying the total price.

In this case the figure shows the example of the initial display of the identification of the software version 1.02 and the date of issue 31 January 2006.
